

Call for flashlight presentations at the Night of Science 2024

Carolina Moreno Hernández and José Undurraga at Night of Science 2022

Topic: **Interdisciplinarity - Touching the Boundaries of your Research Field**

Context: Interdisciplinary collaboration is often presented as the most effective strategy to advance the science required for tackling complex environmental topics. At this year's Night of Science, we are excited to hear and debate how our faculty is dealing with this claim. We aim to take a deeper look at the boundaries and interfaces of our research fields.

Presentations:

- ✓ 5 minutes per presentation
- ✓ Focus the first 1-2 minutes of your talk on your research questions in a clear and concise way.
- ✓ Engage with the following questions for the remaining time:
- ✓ The preparation workshop (a week prior to the NoS) will give you the time and support to revise, rehearse and polish your presentation in a supportive and generative environment.

Guiding questions:

- ✓ Does your research touch or cross over into other disciplines? If yes, which disciplines and how (combining different perspectives, concepts, methods, etc.)?
- ✓ Is interdisciplinarity at the core of your research or is it more marginal or complementary?
- ✓ What are the main benefits and challenges of working in an interdisciplinary way?

Dates: 14.11.2024, 18:00, Night of Science

07.11.2024, 09:00-14:00, Preparation Workshop (provisional date, final date will be fixed with presenters)

Target group: PhD students at any stage; we aim at 4-5 presentations

Programme: [here](#)

Ready to go? Sign up for a flashlight presentation: [here](#)

QUESTIONS?

Feel free to contact Esther or Haifa at any time: esther.muschelknautz@unr.uni-freiburg.de, 0761-203 3607, room 02045, Tennenbacherstraße 4, haifa.debouk@unr.uni-freiburg.de
